PROFESSIONAL SUMMARY

Software Engineer with over 6 years of experience designing, configuring, supporting, and enhancing Warehouse Management Systems (WMS) across global fulfillment networks. Strong background in HighJump and Manhattan support, SQL development, root cause analysis, system integrations, and operational workflow optimization. Experienced in partnering with Operations and non-technical stakeholders to translate complex business requirements into scalable technical solutions. Proven track record of improving system performance, resolving systemic production issues, and supporting multi-site warehouse environments.

CORE SKILLS

WMS & Logistics Systems: HighJump & Manhattan support, outbound systems, returns & recovery workflows, warehouse operations support

Languages & Frameworks: JavaScript, TypeScript, React, Redux, Node.js, PHP

Back-End / Databases: PostgreSQL, SQL Server, SQL query optimization, stored procedures, API troubleshooting

Integrations & APIs: REST APIs, OAuth integrations, system interface support

DevOps / Monitoring: Docker, Jenkins, Kibana, DataDog, observability tools

Tools & Systems: Jira, Confluence, ServiceNow, PagerDuty

Specialties: Root cause analysis, production incident resolution, business process documentation, system optimization, cross-functional collaboration, multi-site support

PROFESSIONAL EXPERIENCE

Software Engineer – Quality & Recovery Systems

Wayfair | June 2025 – January 2026

- Served as a permanent Critical Rotations Engineer responsible for triaging and resolving high-priority production incidents impacting Quality Control (QC) and reverse logistics workflows across multiple fulfillment centers.
- Owned day-to-day critical ticket intake, performed rapid root cause analysis, and deployed immediate fixes to minimize operational downtime.
- Escalated complex issues into structured sprint workstreams, ensuring proper scoping, prioritization, and long-term resolution through standard SDLC processes.
- Built and maintained microservices and React/TypeScript applications integrated with WMS and returns platforms to support defect detection and recovery automation.
- Partnered closely with Operations, Product, and analytics teams to translate urgent business issues into system-driven solutions while improving overall application stability and performance.

Global WMS Application Support Engineer

Wayfair | August 2023 – June 2025

- Provided Tier 1 and Tier 2 application support for HighJump WMS across 18+ fulfillment centers in a multi-state environment.
- Triaged, troubleshooted, and resolved 160+ production defects annually using SQL queries, Kibana logs, and DataDog monitoring dashboards.
- Diagnosed root causes of recurring systemic issues and authored production fixes to improve outbound, inventory, and returns workflows.
- Supported integrations between WMS and internal systems by validating data persistence, troubleshooting interface errors, and ensuring data integrity.
- Partnered with warehouse Operations leadership to document business requirements and translate them into system-driven optimizations.

- Built and maintained advanced SQL reports to support operational decision-making and performance monitoring.
- Led escalations, communicated issue status to stakeholders, and ensured resolution with urgency in a fast-paced logistics environment.
- Mentored 15+ junior engineers and improved SOP documentation and knowledge-sharing processes.

Software Engineer I – WMS Outbound Systems

Wayfair | March 2022 – July 2023

- Developed enhancements and bug fixes in JavaScript/TypeScript and SQL, supporting outbound warehouse workflows.
- Designed and executed SQL queries and data transformations to support custom business flows and reporting needs.
- Collaborated with cross-functional teams to analyze business requirements and implement scalable system changes.
- Participated in rollout planning, testing, and validation to ensure stable releases across fulfillment centers.
- Improved documentation and troubleshooting playbooks to reduce mean time to resolution (MTTR).

Warehouse IT Support Engineer

Wayfair | August 2020 – March 2022

- Supported WMS-related hardware, networking, and infrastructure systems at warehouse sites.
- Partnered with Operations to troubleshoot system and device issues impacting warehouse execution.
- Led site audits and ensured systems met operational performance standards.

WMS Inventory Control Administrator

Wayfair | March 2019 – August 2020

- Supported WMS configuration, data validation, and inventory reconciliation processes.
- Created SQL-based and Excel-driven reports to validate inventory accuracy and support operational decisions.

SELECTED PROJECTS

ForkLine (Multi-Tenant B2B SaaS | Restaurant Pickup Ordering Platform) | forklines.com

- Architected and built a full-stack multi-tenant SaaS application using React 18, TypeScript, and Express 5, with a Vite-powered client and shared Zod schemas enforcing type safety across client and server boundaries.
- Designed and implemented a PostgreSQL-backed data layer using Drizzle ORM with versioned schema migrations; all prices stored as integer cents to prevent floating-point precision errors in financial calculations.
- Integrated three third-party APIs — Nash (DoorDash Drive delivery orchestration), Stripe (subscription billing + webhook verification), and Twilio (SMS order notifications)

SoundSink (Full-Stack Personal Project) | soundsinkapp.com | [GitHub](https://github.com)

- Designed and developed a full-stack web application enabling users to stream, organize, and synchronize audio playlists.
- Built front-end with React and TypeScript using Redux for state management and scalable UI design.
- Developed back-end services in Node.js with PostgreSQL to persist and transform application data.
- Implemented API integrations with Spotify and Apple Music to synchronize external systems and manage data flows.
- Deployed using Docker and CI/CD pipelines for automated builds and system reliability.
- Improved application performance through query optimization, caching, and API efficiency improvements.

EDUCATION

Associate of Science – Computer Science

Norco College | Norco, CA
